APEXINTERACTIVE Reports

UserHowto Guide

Oracle Application Express Interactive Reports (APEX IR) offer dynamic functionality with a wealth of built-in features and its enhanced toolbar. This allows you to customize these reports to specifically show the data you are interested in. The interactive reporting function is available in a number of applications used here at Valdosta State Universityding but not limited to:

- x Success Portal
- x FinancialsData Warehouse
- x Degree Works
- x Employee Training Database

Learn to use Interactive Reports (LR)

Interactive Report (IR) Features

The APEX Roolbar is comprised of a Search Bar and an Action Menu.

The Search Barthe left portion of the toolbar, allows you to search based on a key word that you enter The dropdown menu (magnifiericon) allows you to select whether you search a single column or all columns for this key word.

TheActions Menu on the right side of the toolbar, provides a dropdolient of actions that you may perform on the data set.g., select columns filter, rows per page, sort, save report, aggregate, download, etc///e will talk more about each of these functions below.

Actions Menu Tools

Actions Menu > Select Column Select Columns

This function allows you to select and order the displayed columns you click Select Columns in the Action Menu, a pour window will appear. Selecting a column and then clicking the left or right arrow buttons, allows you to move the column to the left or right side of the window. Only the columns on the rightill be visible on your report Clicking the double arrows (>> or <<) move all columns at the same time.

If you select a column in the right side of the window, clicking the up or down arrow buttor will allow you to adjust the order that columns appear in	ıS

Actions Menu > Filte. Filter

Creating a filter allows you to create simple or compositions to define which columns or rows that appear in your report. When you select Filter in the Actions Menu, author window will appear. Here you will be able to set the conditions for a filter that meets your individual reporting needs. Clicket Apply button when you have finished making changes. More in-depth documentation on filters can be found on Oracle's website

When you return to the report, you will see a list of youthers directly below the Actions Menu. Click the X on the right of a filter to remove it from the report.

Actions Menu > Rows Per Page

You can adjust the number of rows that **atis**played on each of the pages of your report When you click Rows Per Page in the Action Menu, a dropdown menu will appear. Select the number of rows you would like displayed. Alternatively, there is a selection listed to display all rows.

Actions Menu > Format > Sort

This tool allows you to change the order in which data is displayed by sorting rows alphabetically or numerically based on one more more of the columns. You can also sort the rows by clicking on a column header and the sort Ascending or Sort Descending icons that appear.

Actions Menu > Format > Control Break

This tool allows you to groupows of data together based on a common from one or more of the columns. Click the X on the right of a control

Actions Menu > Format > Compute

This tool allows you toreate
