and he was active on various other boards and committees of local civic importance.

In a 1995 resume, Dr. Faircloth cited his research interests as vascular flora of the Atlantic-Gulf Coastal Plain, biosystematics of Ophioglossum in the United States hinevetematics of Ranticia arachnifora Duncan

ecosystems of short-sighted, selfishly motivated, and ignorant human actions. Congruously, Wayne's son, Wilson, earned the B.S. in Botany from the University of Georgia in 1997 and was awarded the Ph.D. in Weed Science from Auburn University in 2004, with *Imperata cylindrica* the subject of his research.
