Biology Department, College of Arts & Sciences, Valdosta State University SPRING 2011----COURSE SYLLABUS*

<u>BIOL 3100, Sections A & B. Microbiology</u> (CRN 21202 & 21203) - 4 credit hours <u>BIOL 5100, Sections A & B. Microbiology</u> (CRN 21231& 21232) - 4 credit hours**

Class: TR 8:00-9:15 am, 2022 Bailey Science Center

Laboratory: TR 3100/5100 Section A 10:00-11:25 am, 2068 Bailey Science Center

TR 3100/5100 <u>Section B</u> 2:00-3:25 pm, 2068 Bailey Science Center

<u>Instructor:</u> Dr. Jenifer Turco Email: jturco@valdosta.edu

Telephone: 229-249-4845 Office: 2091 Bailey Science Center

Office Hours: Tues. 4:30-5:30 pm & Thurs. 12:30-1:30 pm; or by appointment.

Course Description:

BIOL 3100 Microbiology 3-3-4 (4 credit hours)

Prerequisites: BIOL 2010, BIOL 2230, BIOL 2270, CHEM 1212/1212L. Recommended: CHEM 3402.

BIOL 5100 Microbiology 3-3-4 (4 credit hours)

Prerequisite: Admission into the graduate program or permission of the instructor. Survey of microbiology covering eubacteria, archaebacteria, protozoa, fungi, algae, and viruses. Includes fundamental techniques, microbial physiology and genetics, biotechnology, medical applications, and applied microbiology. Two 1.5 hour laboratory periods per week.

Required Textbook: BROCK BIOLOGY OF MICROORGANISMS, Twelfth Edition

by Michael T. Madigan, John M. Martinko, Paul V. Dunlap, and David P. Clark

Prentice Hall 2009

Required Lab Manual: BENSON'S MICROBIOLOGICAL APPLICATIONS, LABORATORY MANUAL

IN GENERAL MICROBIOLOGY (Complete Version), Eleventh Edition

by Alfred E. Brown McGraw-Hill, Inc. 2009

Other Required Items: A notebook for recording the results of laboratory work

Calculator that is not integrated with a cell phone

Permanent, fine-tip marking pen ("Sharpie") for labeling cultures in lab

One CD (or jump drive) for oral presentation

One thin, light-weight folder for handing in references & other assignments (Please do not

use a 3-ring binder to hand in assignments.)

Paper clips or stapler/staples for organizing references & assignments

Special notes to students:

- 1. In order to respect the privacy of each student, exam scores and grades will not be posted, given out by telephone, or sent to students by email.
- 2. Students should consult the VSU Student Handbook, Catalog, Semester Calendar, Schedule of Classes, & Registration Guide for information about VSU policies and procedures regarding registration, drop/add, and withdrawal. March 3 is midterm. Students are not permitted to withdraw after midterm except in cases of hardship.
- 3. Students requesting classroom accommodations or modifications because of a documented disability should discuss this need with the instructor at the beginning of the semester. These students must contact the Access Office for Students with Disabilities located in Farber Hall. The phone numbers are 245-2498 (V/VP) and 219-1348 (TTY).
- 4. Cell phones may not be used during examinations or at any time in class or lab.
- 5. Students must read and follow the Biology Department policy on plagiarism (available online through the departmental web site). The instructor may use a variety of methods for detecting plagiarism. Each student must be particularly careful to do his/her own writing on the oral presentations and on any assignments/reports that are to be completed individually. Plagiarism will result in a grade of "0" for the assignment. A student who plagiarizes on more than one assignment will receive a grade of "F" in the course.
- 6. No disruptive behavior will be tolerated during class or lab. A student who engages in disruptive behavior will be asked to leave.
- 7. Students who wish to use laptop computers as part of the class are required to sit in the first three rows of the classroom.

*This is a tentative syllabus. Changes to this syllabus will be announced during class or laboratory periods; alternatively, changes may be posted on BlazeView.

**Graduate students who are taking BIOL 5100 must meet with the instructor to discuss additional course requirements & grading.

Course Objectives:

(Page 3 shows how the objectives below are aligned with the VSU General Education Outcomes and the Biology Department Education Outcomes.)

After successful completion of this course, the student should be able to:

- A. List and describe the three domains of living organisms.
- B. List and describe the three types of noncellular infectious agents.
- C. List several activities of microorganisms that are beneficial to humans and the environment.
- D. List and briefly explain several current challenges in medical microbiology and infectious diseases.
- E. Compare and contrast the structure and function of the microorganisms in the domains Bacteria, Archaea, and Eukarya.
- F. List and describe the various strageties used by microorganisms to obtain carbon, energy, and electrons.
- G. Describe the growth of a pure culture definantes fire in BDOMET EMECON and described by close al toture

The course objectives that are aligned with the VSU General Education Outcomes and Biology De	epartment Educational Outcomes

Thurs. Feb. 1	OLCONTINUED FROM PAGE 5	

FINISH EX. 10, PURE CULTURE TECHNIQUES, STREAK-PLATE METHOD ONLY Examine plates from Tuesday. If your group hasn't yet established a general unknown nutrient agar slant culture, please do this today. If you are looking at a streak plate prepared <u>from</u> a well-isolated colony, pick a well-isolated colony and transfer it to a nutrient agar slant. This can be your group's general unknown culture; please label it clearly with "<u>UNKNOWN", your lab section, and seat numbers</u>. If, for some reason, your group has no suitable colonies, please consult the instructor.

> SUPPL. EX., ENUMERATION OF BACTERIA ASSOCIATED WITH FRESH PRODUCE (SPREAD-PLATE TECHNIQUE) Work in Groups of 2 for this exercise. ALSO, Please READ ex. 22 to learn about the Pour-Plate Technique, Omitting p. 155-157.
