

Certification Information

Department of Middle Grades and Secondary Education

Biology

Introduction

Thank you for your interest in Valdosta State University for obtaining a teaching certificate. Admission requirements into a certification program are a bachelor's degree, an overall GPA of 2.5, and have passed or exempted the GACE Basic Skills. Exemptions for the GACE Basic Skills test are achieved by high scores on the SAT (1000), ACT (43) or GRE (1030).

At the completion of this program you will be eligible to teach biology at the 7 – 12 grades levels. There are several courses in this program that are only offered during the day due to field experiences in the public schools. Many classes are offered at night BUT not all of them so this program cannot be completed just through evening classes.

Certification Evaluation: A review of all previous course work will be compared with the required courses as listed on the attached pages to determine an individualized certification plan leading to your secondary biology certificate. Professional development, relevant work experiences, similar courses, or other activities may be used to satisfy some of the required courses. You are expected to provide all college transcripts and any other documentation needed to verify which course expectations have been met and which courses will be included in your plan. There is a \$35 fee for this plan, which will represent a contract that lists all requirements needed for you to obtain the secondary biology certificate. The plan is good for three years.

The writer of your certification plan will also serve as your advisor throughout completion of your program. After you receive the plan, you should review the courses to ensure that you have not completed similar courses or professional development activities. After your plan is finalized then you and your advisor can devel
